

What is the PCN?

A collaborative network of primary care providers, including family physicians, nurse practitioners and allied health care providers, working together to improve the delivery and coordination of patient care across Scarborough.

Why Join the PCN?

Voice in Decision Making

Ensure primary care is heard by contributing your perspective to planning and priority-setting locally and provincially.

Enhanced Support

Access nurses and allied health professionals to improve patient access to primary care.

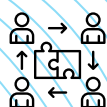

Support with Tools

Gain easy support to Online Appointment Booking (OAB), eReferral, SCOPE, and AI Scribe.

Connect and Collaborate

Opportunities to connect with other providers, to share resources, best practices and collaborate on solutions.

Improve Care Coordination

Strengthen connections with hospitals, specialists, and community services to streamline referrals and follow-up care.

Scarborough Ontario
Health Team

Primary Care Network

Our Vision

To advance excellence in primary care for our communities in Scarborough by co-creating a system of care that is culturally safe, equitable, team-based, integrated, accessible, and responsive.

Support with Digital Health Tools

FindHealth

Your Primary Care Network has built a virtual tool for physicians by physicians to:

1. **Support** your membership into your Primary Care Network.
2. **Create** a space for you to inform us of your needs & supports that you require for your practice.
3. **Strengthen** our ability to bring the right resources to you (for example, when needs such as nursing or allied health support are identified, we can help build relationships with Interprofessional Primary Care-funded teams and introduce opportunities for team-based care).

Scan this QR code to register or update your account, join the Primary Care Network, and identify the resources and supports your practice needs.

Online Appointment Booking (OAB)

Online appointment booking lets patients book or reschedule anytime from any device and receive reminders through their preferred method. For clinicians, it offers customizable appointment durations and visit types, while integrating directly with the EMR to support flexible scheduling for both providers and administrative staff.

eReferral

eReferral enables clinicians to submit and track referrals electronically, improving communication and reducing delays associated with traditional fax-based processes. eReferral helps reduce duplicate referrals, improve patient safety by minimizing lost referrals, lessen administrative burden.

AI SCRIBE

AI Scribe solutions support clinicians by generating accurate, structured clinical documentation from patient encounters. The SOHT team is here to support you if you're interested in integrating an AI Scribe into your workflow and can also connect you with potential funding opportunities.

SCOPE

SCOPE (Seamless Care Optimizing Patient Experience) is a virtual interprofessional health team that supports clinicians through a single point of access (e.g., nurse navigation, specialist supports including hospitalist and diagnostic imaging on-call).
